Subject AAR concerning the events around CHORA (16 – 20 June)

1. Introduction

At the end of June a lot happened in and around Chora. After a long build up of OMF, they attacked the village and its surrounding villages and TFU units countered this threat. To ensure an open and transparent evaluation of the events that took place multiple inquiries were conducted. This inquiry will mainly be limited to the period of the 16th of June up and until the 20th of June.

2. Problem

Lay down the events that occurred in and around Chora and the decisions leading to this.

3. Dissertation

a. Situation

1) Operation Aramay

Operation ARAMAY is the baseline plan of Commander TFU with his intent and way of operating for the next 5 months. This operation plan covers the period of the 1st of May until the 1st of October 2007. The main focus within this plan lies on the Deh Rashan area north of Tarin Kowt. Another important objective of Commander TFU is the preservation of Chora and especially the District Center.

2) Operation Leonidas

Since the beginning of our tour at the end of January 2007 reports came in that OMF intends to attack the Chora District Center. By the end of April this threat becomes imminent and TFU units are tasked to deploy to Chora and preserve it (Operation Rabenhaupt). After a prolongation the operation Rabenhaupt ends the 2nd of June. Since the preservation of the Chora District Centre is still valid and Commander TFU wants to focus more on development and the hand over to ANSF Commander TFU issued a new fragmentation order: frago 019 (OP LEONIDAS) to OPORDER 03 (OP ARAMAY). This oporder gave guidelines on the intent and the concept of operations of the commander. Focus was on the build up of local governance and the AN(A)P to be able to preserve Chora themselves. After the outbreak of hostilities the 16th of June operation Troy is started to withstand the high OMF pressure on Chora. On the 21st of June operation Troy is recalled and the operation Leonidas is valid again.

3) Phasing

The period from the 16th until the 20th of June can be divided in five phases.

a) Phase 0

This is the period before the real outbreak of hostilities. It will only be summarily covered in the After Action Report. This period can be characterised by OMF conducting harassment attacks against the checkpoints around Chora and the build up of OMF troops.

b) Phase I (Prelude: 16 June 0400 hrs – 16 June 2000 hrs)

This is the build up of OMF pressure just prior their attack. OMF is moving forward, conquering the checkpoints around Chora.

c) Phase II (Defence: 16 June 2000 hrs – 17 June 0400 hrs)

In this phase OMF is really attacking the village of Chora and want to defeat TFU forces. TFU forces defend and stay in control of the District Centre.

d) Phase III (Status Quo: 17 June 0400 hrs – 19 June 1030 hrs)

In this phase TFU forces are still in control of the District Centre and are periodically engaged by OMF.

e) Phase IV (Attack: 19 June 1030 hrs – 19 June 1800 hrs)

In this phase TFU troops, with the Battle Group as supported commander, together with ANA, attack in western direction to push back the OMF in order to take control of the wider area around Chora (including the checkpoints that have been conquered by the OMF).

f) Phase V (Aftermath: 19 June 1800 hrs – 20 June 2400 hrs)

This is the phase direct after the attack. OMF resistance is only limited and the main focus of the TFU is investigate the events in the recent history and also countering left OMF resistance if necessary.

4) After Action Report

Attached you will find all the reports on the events that happened in the before mentioned period in and around Chora. The After Action Report (AAR) is the main document. All other documents are attached to this (AAR) and will contribute to the understanding of what happened in Chora.

4. Way ahead

- a. Operation Leonidas will be proceeded in order to be able to return to normal operations as they were being conducted prior to operation Rabenhaupt.
- b. Inquiry boards will be supported by all TFU personnel within their capabilities.
- c. Further inquiries to disclose information on the events in Chora will be conducted if required.

Commander Taskforce Uruzgan

1. After Action Report and annexes

AFTER ACTION REPORT (AAR) on CHORA DC d.d. 16-06-07 till 20-06-07.

NR TIC: 06-410 /OP TROY / 06-495

DTG: 16-06-07 until 20-06-07

1) AREA OF OPERATION

CHORA, SARAB, NORTH DEH RASHAN

2) COMPOSITION OF UNIT

Supplement B: ISIS Snap-shots Force laydown 16th till 20th of June

During the five phases, several force compositions were present in the CHORA DC area. Units involved throughout the five phases were: three (3) Mechanized Inf platoons, two (2) Light armoured Inf platoons, one (1) Recce platoon (FENNEK), one (1) VCP 42 AIBG TFU and one (1) ANA Coy (90 pax) including OMLT (moving in 3 groups).

3) MISSION/CONOPS OF UNIT (OP LEONIDAS¹)

Intent

By countering OMF attacks on CHORA I want to be able to continue the positive developments that are ongoing in that area. By creating a situation where ANSF is able to preserve CHORA I want to return to the situation where ANSF is primarily responsible for the security and TFU is supporting the local governance of CHORA on all lines of operation. I realise this will be event and intell driven.

a) Conops

TFU elms will be the primary force to defend CHORA. In due time ANSF will take over the responsibility for the security in that area. This will take some time and all effort must be focused on that direction. This means all TFU assets must direct their capabilities, be it through their contacts or through physical presence, to achieve this situation. Slowly the situation must shift from TFU security to ANSF security. In the mean time TFU elms must be prepared to counter any OMF threat directed towards CHORA.

b) Main effort

Securing CHORA

c) Phases

i) Phase 0: Operation Rabenhaupt

The period before the time period in this Frago 42 AIBG was primarily responsible for the security in CHORA with the aim on preservation of CHORA. This phase ended 1 June 2007.

ii) Phase 1: Transition

In this phase 42 AIBG and ANSF will conduct combined operations to preserve CHORA and to set the conditions for the hand over to ANSF. This phase started 2 June 2007.

iii) Phase 2: NFO

In this phase ANSF will primarily be responsible for the security in CHORA. TFU elms will support the local governance on all lines of operation by conducting NFO.

d) 42 AIBG

42 AIBG is to keep presence in CHORA IOT preserve it and set the conditions for a hand over to the ANSF.

¹ (See FRAGO 019 (OP LEONIDAS) to Opord 003 (OP ARAMAY) of COM 1 (NLD/AUS) TFU ISAF.

e) PRT

PRT is to spt 42 AIBG in securing CHORA and a responsible hand over to ANSF and start up development activities in the area, in phase 1 specifically focused on capacity building of ANSF.

f) All other units

Spt BG IOT facilitate a responsible hand over to ANSF.

g) Coordinating instructions.

In phase 1 of this operation ROE is delegated to BG.

4) EXECUTION

Review of events according to five phases of the AAR:

Phase 0 General

Already for weeks reports came in via G2 TFU on a build-up of OMF in the areas and valleys around CHORA. Harassment attacks against ISAF, ANSF and the local population have been ongoing for some considerable time. Examples of these harassment attacks are harassment fires occurring against the CHPs around CHORA and a pressure-plate IED that has been used against a civilian taxi, in the course of which several civilians were killed and wounded. Also ANP, carrying out a search and arresting several Taliban in West-CHORA, were threatened by Taliban to release their leaders, leading to a tense situation. Already in April OMF successfully occupied the CHP at KALA KALA after which BG TFU assisted ANP in re-capturing the CHP. Reporting in the last days stated that local population was growing restless, already leaving their qalas, closing their shops at the bazaar and that children were not going to school anymore. Also a lot of unrest occurred within the key-leader positions of several GoU local leaders in CHORA, not favouring the situation at hand.

Phase I Prelude.

On Friday 15th of June a SVBIED attack in Tarin Kowt was the upbeat for the attack on CHORA, based on G2 TFU assessments made in the preceding months. OPERATION LEONIDAS is already weeks in effect at that time, giving orders and guide-lines for upcoming operations of TFU Units, especially to the BG TFU and PRT TFU.

In the night of 15 to 16 June aircraft were available above CHORA conducting an area reconnaissance. They discovered OMF troop movements in the area east of CHORA, moving west, in the vicinity of SARAB. G2 TFU assessed a continuing build-up of OMF towards the CHORA area, numbers between 800-1000 fighters. This confirms reportings from G2 TFU in the preceding months which became clear during the early morning of the 16th of June around 0200LT. OMF reported coming from CAHAR CHINEH province, BALUCHI Valley, MIRABAD area, DORAFSHAN area and the valleys North-east of CHORA and East of SARAB, based on eye-witness reports and Intell reports from G2 TFU.

This was the start of a coordinated OMF attack with the objective to seize CHORA DC. The effect to be achieved by the OMF was, and still is, IO exploitation for the new OMF commanders in URUZGAN that they are able to defeat ISAF forces to re-establish FOM on OMF LOCs from GIZAB to the southern part of AFGHANISTAN.

The 16th of June shows more Troops in Contact (TICs) involving ANSF in CHORA and BG TFU. All units present at that time receive fire from OMF side and OMF tries to close in to CHORA DC from all sides. ANP posts are then no longer able to accurately defend themselves. On the 16th of June Commander TFU decided to act pre-emptive and ordered the BG to further reinforce CHORA.

Phase II Defence.

On the early evening of the 16th of June situation in CHORA deteriorates in a way, that Commander A-coy AIBG declares that if the situation will not be altered quickly in favour of ANSF or TFU, he will be run over and OMF will be able to seize CHORA DC. This (and latest reportings) is the trigger for Commander TFU to consider the situation. Present were Commander TFU (Col van Griensven), COS TFU (), G3 TFU (), Regad TFU (), Commander AIBG () and S3 AIBG (). The situation had developed in a way that there were 2 options left: leave and let CHORA fall into the hands of the OMF or stay and defend CHORA.

Leaving CHORA was no option. The population would flee from OMF occupation. Already there were reportings on OMF executing people that were pro-GoU or refused to fight with them. Leaving CHORA would also mean that OMF would have a big IO as well as a geographical success. It would increase the pressure on TARIN KOWT, endanger the TFU mission and undermine the credibility of ISAF and TFU in particular. That is why Commander TFU decided to stay, reinforce and defend CHORA with all means available. There was also discussion on how this could be done most effectively under the given circumstances. Avoiding collateral damage as much as possible was one of the main topics.

To synchronize the support to 42 AIBG in CHORA an engagement area is created. Initially this area was the area west of the vertical 21. This is the area where the last two days most of the OMF reportings came from. To support the unit on the ground in its self defence this is the area where 42 AIBG can target at pinpointed known targets such as avenues of approach of the OMF and known strongholds from previous reportings without direct eyes on. This has been done in consultation with RC(S). East of that line direct PID was still necessary before engagement was allowed. This control measurement was imposed to minimise collateral damage.

Before engaging in the area, west of vertical 21, started, the local population was warned to leave that area through their tribal leaders. ANP was used to pick-up the population and bring them East of the vertical 22. This all happened prior to bringing the engagement area into effect.

TFU as of then used all assets available to turn the tide and give Cdr A-coy all support needed to prevent CHORA and themselves from being overrun. An intensive night of battle between BG TF assets and OMF takes place. In the early morning, around 17.0400LT JUN 07 resulting in a situation in favour of TFU ISAF and local national population by having taken away the initiative from OMF side.

Phase III Status Quo.

Around 17.0400LT JUN 07, COM BG TFU and some reinforcements went to CHORA with his VCP to establish contact with Cdr A-coy. OMF is still trying to get hold of SARAB HILL and SARAB VILLAGE (at that moment still in the hands of () CHP commander SARAB). Commander TFU issues the frago on Operation TROY in order to reinforce the troops in CHORA and to execute misleading operations to distract OMF from CHORA through the BALUHI valley. During the day of the 17th of June and the 18th of June ongoing fire-fights occur in the CHORA area as well as near SARAB HILL and SARAB VILLAGE. Elements of TFU consolidated their positions while OMF was still active within the green zone. TFU was pushed back into an area of 4 square kilometres around the District Centre. Because of the risk of culmination COM TFU decided to counter-attack in order to re-establish the positions as before the 16th of June.

COM BG and Cdr A-coy are conducting a decision making process to conduct an offensive operation to re-capture the CHPs KALA KALA, NYAZI, at the same time freeing the green zone in CHORA of OMF.

Militias are forming a force to free SARAB HILL and VILLAGE from OMF.

Call signs of TFU (SFTG VIPER and a platoon of 42 AIBG) move to the DORAFSHAN area, South of the BALUCHI PASS, in order to distract OMF from the western part of CHORA. This decreased the pressure on the western side and enabled the BG assets to further establish a status quo, preparing for future operations. An extra platoon is being moved from DEH RAWOD to TARIN KOWT to support the upcoming operation. Furthermore reinforcements are sent to CHORA to defend and to take part in the upcoming attack.

Phase IV Attack.

Operation FLIEGENFANGER of Commander 42 AIBG is issued to take away the last initiative of OMF in the CHORA area, freeing the green zone of OMF, re-occupying the CHPs KALA KALA and NYAZI. At 10.30 hrs elements of the TFU under command of Commander 42 AIBG attack into western direction. ANA & OMLT play an important role in this operation. Elements of the BG attack on a northern and southern axis while ANA proceed along the central axis through the green zone. At the end of the day the objectives have been seized. The CHPs are again in ANSF/TFU hands and the OMF has been driven from the green zone. In the mean time the militias from CHORA are moving into eastern direction in order to re-taking SARAB CHP and SARAB Village. They also achieve their objectives.

Phase V Aftermath.

After the seizure of the CHPs the focus is back again on having the local authorities in the lead again. At this moment ANA is still occupying the CHPs west of CHORA with TOOR ABDULLAH again on the CHPs in SARAB. TFU is decreasing the number of forces in CHORA and returning to the situation as it was before the 16th of June. At the same time continuous efforts were being made to get information on any damage occurred and any casualties inflicted by either side.

Detailed info you will find in the mentioned Supplements below and especially the detailed Logbooks of BG TFU, Logbooks TFU HQ (including message-interaction between RC(S) and Opsroom TFU HQ). Also the extended reports on used Artillery and air-assets, gives a good view on used weaponsystems together with accurate BDA on assets used. The ISIS snap-shots in comparison with the Logbook reportings will complete the view on events occurred and operations run.

5) SITUATION OWN TROOPS (INCL. COALITION FORCES)

a) Personnel

- i) KIA : 1x NLD Mil
- ii) WIA : 4x NLD Mil
- iii) MIA : Nil

b) Logistic

i) Equipment

1x PATRIA damaged due to impact 82mm Mor round, still serviceable. 1x 81mm Mor damaged, out of use, at CHORA DC compound.

ii) Ammunition used

6) ENEMY

a) Intention of OMF

OMF is determined in taking over CHORA DC so OMF can exploit even the smallest success in a massive Informations Operations (IO) campaign. At the same time enhancing and maintaining a guaranteed line of communications and logistical support.

b) Action taken by OMF

The OMF have been building up forces and activities during several weeks in the valleys surrounding CHORA, like BALUCHI VALLEY, and reinforcements were send in from GIZAB, CAHAR CHINEH, the Eastern SARAB area, MIRABAD and even from outside the province. Multiple reportings indicate the presence of foreign fighters.

c) Possible future OMF COA

OMF will continuously try to influence the CHORA area as long as it can contribute to either their IO or their freedom of movement.

d) Detainees made by TFU

Nil

e) KIA/WIA/BATTLE DAMAGE ASSESSMENT

KIA: (based on Definitive Intell reporting received) 150-200x OMF,

WIA: (based on Definitive Intell reporting received) 6x OMF.

No definitive reportings or visual confirmation based on body-count could have been made. It is a known OMF TTP to take away any WIA and KIA from the battle-field under any circumstances.

7) CIVILIANS

Involvement on infrastructure and population.

Phase 0 General.

Nil

Phase I Prelude.

a) Involvement

Not known if any civilians were actively involved in the fights that occurred during this period.

b) Impact

Via PRT reports are coming in about people being killed by the OMF.

c) Casualties

Unknown.

Phase II Defence.

a) Involvement

It is assessed as likely that local civilians during this period took up arms against OMF. Reportings also indicate that civilians were forced by the OMF to join them and to fight with them. This can not be confirmed by TFU elements in CHORA. It is assessed that local population is involved in the fights in and around CHORA. A large effort has been put in the warning of the population by BG TFU and Mission teams

towards tribal leaders to get the population into safety. ANP helped to evacuate the population at risk.

b) Impact

Not known, assessed that the local population has been affected by the attacks of OMF. Although likely, it is not known if and how many local nationals were involved in the fights that have occurred.

c) Casualties

Exact numbers have not been reported on KIA and WIA LNs. Counting the casualties is not possible, even not by local authorities, therefore exact numbers and wounded can not be determined. Death people are being buried within 24hrs after having deceased. Wounded people are not always being taken to the nearest hospital or reported to other medical facilities / aid-stations. Reports come in on atrocities committed by the OMF to the local population. However, although all effort has been put in to minimize collateral damage, it can not be excluded that LNs have been wounded or killed by TFU and ISAF (air) assets, although some reports indicate that a number of civilians might already have been killed prior to the defence phase. PRT has been investigating the possible collateral damage and the possible casualties amongst the population.

See Supplement L: Functional Specialist reports PRT

Phase III Status Quo.

a) Involvement

Since fighting was still going on, out of the side of TFU units, it can be assessed that the population took up their arms to defend themselves against the OMF. Definitive reports on this are not available. Also some of the population moved further out of the endangered area because they were afraid. At the same time, some of the shops in CHORA went open and children came to school again. Hereby giving the signals that the local population still believed in a safe and secure CHORA.

Reports came in that OMF are harassing GoU minded population, also stating some were killed, amongst them women and children.

b) Impact: nstr

c) Casualties

No known casualties from this phase.

See Supplement L: Functional Specialist reports PRT

Phase IV Attack.

a) Involvement

Reportings come in that local population is being further harassed by OMF.

Population are taking up arms to secure themselves from OMF harassment.

actively rounds up people (militia) to re-capture and free SARAB from OMF together with the remnants of the ANP left in CHORA.

b) Impact

NSTR

c) Casualties

No known casualties have been reported from this period.

See Supplement L: Functional Specialist reports PRT

Phase V.

- a) Involvement
The population is returning to normal life. Shops are opening again and children are going to school.
- b) Impact
Unknown.
- c) Casualties
More light can be shed on the current situation, because larger party of PRT Functional Specialists are sent to CHORA for assessing the situation. Reportings are coming in at TFU as of that moment.

Conclusive:

The most accurate information can be found in the reportings from Functional Specialist Health of the PRT TFU , together with the report from the Senior Medical Officer of TFU.

8) LOCAL AUTHORITIES/SECURITY FORCES

Phase 0.

- a) Involvement
ANP were defending the CPs around CHORA DC, already lacking ammunition. Not being supported by authorities from TARIN KOWT.
- b) Impact
Occupation of CPs is to a minimum at times, due to continuous harassment fires.
- c) KIA/WIA/MIA
NSTR

Phase I Prelude.

- a) Involvement
ANP were defending the CPs around CHORA DC, already lacking ammunition. Not being supported by authorities from TARIN KOWT.
- b) Impact
Occupation of CPs is to a minimum at times, due to continuous harassment fires.
- c) KIA/WIA/MIA
Not known.

Phase II Defence.

- a) Involvement
Local authorities have asked TFU to defend CHORA against any OMF influence. Local authorities also played a large role in alarming LNs in the CHORA DC area for the fighting activities at hand. They advised and asked LNs involved to, at least for the time being, leave the area. They assisted in bringing local national population to safer areas East of CHORA DC. ANA is also deployed in CHORA. They are in the direct surroundings of the DC acting as a QRF. ANP is initially defending the CHPs. Eventually they have to leave the CHPs and flee. It is not exactly known where they ran to. Some were picked up to return to the DC.
- b) Impact
Impact on the local authorities is not known in this phase.
- c) KIA/WIA/MIA
Not known.

Phase III Status Quo.

- a) Involvement
ANP is on CHORA DC. ANA & OMLT are moving with BG TFU to CHORA DC. In total 90 pax ANA are present during this period.
- b) Impact
ANP is not effective anymore.
- c) KIA/WIA/MIA
Not known.

Phase IV Attack.

- a) Involvement
90 pax ANA & OMLT are taking part in the attack in CHORA DC area against OMF, alongside with BG TFU. First ANA moves through the Green Zone towards the West part of CHORA. They have the task to finally take possession of CPs KALA KALA, NYAZI and key-terrain part CEMETARY HILL. It is in this phase that [REDACTED] has brought together at first 30 pax and later 120-150 pax to fight along TFU units in the counter-attack in CHORA DC area. [REDACTED] is the QRF ANP commander and he moved to SARAB and re-conquered the SARAB HILL and SARAB VILLAGE on OMF.
- b) Impact
Not known.
- c) KIA/WIA/MIA
ANA none, militia unknown.

Phase V Aftermath.

- a) Involvement
ASP (87 pax) are pushed towards CHORA CPs, after a delay, so ANA can be released from the CPs. Current ASP as well as ANA & OMLT are in CHORA DC area for securing the area, together with a platoon from BG TFU. Not before ASP had arrived, BG TFU could down-size there force lay-down in CHORA.
- b) Impact
NSTR.
- c) KIA/WIA/MIA
NSTR.

9) **LEGAL AUTHORITIES**

Phase 0

Nothing special to report.

Phase I Prelude

In the weeks earlier, already several fire-fights with OMF occurred and information from Intell sources state that an OMF attack was imminent or already at hand, therefore the reportings on TICs as of the 16th of June show a clear build-up of pressure from OMF on CHORA DC area. For a detailed report see Supplement B and D. Final Intell reportings state that large numbers of OMF are starting to move up to CHORA as of 160210LT JUN 07. A PID can not be established at that time on spotted movements witnessed by [REDACTED] (fixed wing air-support). Therefore no firings occurred on these persons. What becomes clear, based on more Intell reports, is the high and likely probability that OMF is preparing a (coordinated) attack on CHORA. As of 16.0637LT OMF starts with the actual firings of weaponsystems like 82m Mors, RPGs and small

arms fire on positions of TFU and CHPs occupied by ANP (Aghan National Police). At that moment the act of self-defence is a fact and OMF fires are being answered by BG TFU elements supported by air-assets of ISAF and RC(S) available, both fixed and rotary wing.

As of this moment in time OMF continues to engage our TFU and ANSF units during the rest of the day. A situation occurs of continuous threat on TFU/ANSF units and of course there exists now the inherent right of (extended) self-defence. Furthermore, for this situation ROE have been delegated to COM TFU by COM RC(S). For details on all situations in which OMF fire has been received and answered, I refer to mentioned logbooks.

In all situations that occurred, the actions taken by TFU were taken within the given ROE delegations and, as far as it can be investigated, only use of necessary force, proportional and minimum of amount of force needed has been used taking into account the operational circumstances. As far as it shows there has been no reportings of any relevant collateral damage thus far.

Phase II Defence.

During the entire day of the 16th of June, as mentioned earlier, TFU have been in firing contact with OMF. From Intell reports it obviously came clear that the OMF intended to conquer CHORA DC. Especially as of 16.1950LT JUN 07 the situation worsened around CHORA DC, that much that Cdr A-coy needed all assets available in CHORA of TFU and ANP to keep CHORA out of the hands of OMF. At this time darkness sets in and Cdr A-coy states quite clear that CHORA DC will fall if not being supported as soon as possible with all assets available. Moreover, the CHPs KALA KALA, NYAZI and SARAB seem to be fallen under OMF control. At 16.2054LT JUN 07 an engagement area had been created and ordered west of vertical 42S TB 21. Reason for this was that Intell reports and reports from Cdr A-coy stated that large concentrations of OMF were moving within the limits of this area. After consultation with RC(S) within this area EF were engaged without PID as of being a serious and imminent threat, after LNs were warned through their leadership.

Large concentrations of OMF on its own already forms enough ground for self-defence and extended self-defence, because of the fact that there was an imminent attack at hand, the continuous pressure on TFU units rose and the intent of the OMF was clear, also illustrated by final Intell reportings.

Besides this, Commander TFU was authorized on basis of ROE delegation in combination with continuous reporting of hostile intends and hostile acts.

Under named circumstances there has been made a continuous effort to minimize the use of force, especially to minimize the chance of casualties being inflicted under the LNs population and also prevent collateral damage as much as possible.

In order to try to reduce the amount of casualties among civilians, by means of PRT, (Chief of police) was warned at dtg 162130 June 2007 and asked to warn the civilians to leave this area. He on his turn send a car to the tribal leader in the region and living in OAL-EH-YE;RAGH (grid square 42S TB 2137) with the message to take care that all the civilians living in the engagement area had to leave. The village is located in the engagement area. North of the village in the engagement area there is less housing. It was not told to that it might be possible that air operations would be executed, because there was always a chance that OMF would intercept this information.

In the course of the evening and after dtg 162130 June 2007 (exact time unknown) the PRT has phoned with [REDACTED] reported in this conversation that all the woman and children had left already the village. [REDACTED] was advised, together with the males who had stayed behind, also to leave the village. Within the realistic possibilities every measure had been taken to take care that the civilians were warned to the highest possible extend under these circumstances. Needless to say that it was impossible to enter the engagement area with own units to warn the people because of the enormous concentration of OMF in the area.

The necessity to get own units out of a oppressing encirclement, the significance to preserve CHORA as essential for the success of the mission, the request of governor MUNIB to defend in CHORA and the ruthless way of operating of OMF in respect of the civilians (throats were cut of captured civilians and women were burned), were important considerations to meet with the principle of proportionality.

In all situations TFU has acted – taken into account the operational situation – within the applicable ROE. Also in the sense that the presence of large numbers of OMF in the engagement area made this a military objective. As far as known up till now the use of force was necessary, proportional and the minimum force taking into account the operational situation. Under this extreme circumstances, to the highest possible extend, was tried to avoid collateral damage among the civilian population, but with the OMF deliberately mingling with civilians and forcing them to stay, this was very difficult to execute.

Phase III Status Quo.

Between 17.0400LT JUN 07 and the early morning of the 19th. In these phase there have been several TICs. In all situations of engagement by OMF was responded by TFU with the use of force in self defence.

In all situations units of TFU acted within the given ROE delegations. The principles of necessity and proportionality were taken into account.

Phase IV Attack.

During this phase ROE [REDACTED] was authorized to the BG TFU: Op TROY. They haven't met with substantial resistance from OMF. ANA has been in fire-contact with OMF. In a very few situations units of the BG and ANA with OMLT (see Supplement F: OMLT/ANA AAR report) were shot at by the OMF. ANA with OMLT entered several qalas which had just been left by OMF or were still occupied in some cases. In all situations was acted in accordance with the applicable ROE and responded with fire in self-defence. This may have lead to KIA or WIA among OMF, but unknown which number.

Phase V.

Nothing special to report.

10) MEDIA PRESENCE

Media TV-crew of RTL has been present in the area on 20th of June, the day directly after the counter-attack had been executed by BG TFU, together with a visit of Governor Munib and Commander TFU.

COMMANDERS ASSESSMENT

In the early evening of 16 June the situation had deteriorated in a way that FE were pushed back to an area of 4 square kilometres around CHORA DC. I had the choice to leave CHORA and hand over the area with all its inhabitants to the OMF or to stay and defend. Because handing CHORA over to the OMF would not only endanger the population but would also bring a huge IO success to the OMF. And losing CHORA would have a very disastrous effect to the mission of ISAF in general and TFU in particular I decided to stay in CHORA, reinforce and defend fiercely with all means available. Within the ROE given and after consultation with Commander RC(S) we created an engagement area in which we struck the majority of the OMF. This would later turn out to be decisive in the defence of CHORA. Seen the fact that the governor and other local authorities requested us to defend CHORA the importance was stressed. As result of this severe fight I believe that we set back the OMF in trying to achieve their goals and disrupted them for a longer period. Due to the fact that we defended CHORA, the majority of the local population is still supporting us and this gives us the opportunity to further execute our mission in URUZGAN. I regret the fact that it is also likely that there were civilian casualties as result of our defence of CHORA.

IMM Re-supply and transport ANA to CHORA

[04:23] <NLD_TFU_OPS> Unfortunately bad lines. I tried to tell you that we have a CH coming to TK at 0730 for 81mm mor resupply for CHORA. We would like to move 50 PAX ANA as well to CHORA. We would like your approval for this transfer. Might it be possible to get more CHs, or just multiple waves?

[04:25] <RC_S_SDO> Checking with Avn at the moment

[04:26] <NLD_TFU_OPS> rgr

[04:26] <RC_S_SDO> I would prefer 1 wave only but w/o

[04:31] <NLD_TFU_OPS> Sir, 50 PAX ANA and all the ammo won't fit

[04:32] <RC_S_SDO> rgr, i know, other choppers

[04:33] <NLD_TFU_OPS> rgr

[05:04] <RC_S_SDO> It will be done, Avn is looking at earliest possible time. He is working his magic at the moment

[05:06] <NLD_TFU_OPS> rgr and many thx for that.

[05:11] <RC_S_SDO> What is the earliest your trip can be ready for pick-up, where and who is in charge of HLS

[05:15] <NLD_TFU_OPS> 0730LT the will be ready and your Q about HLS will be LL10.

[05:17] <RC_S_SDO> do you have a frequency and where is pick up point for ANA. We are looking at 2 trips

[05:21] <NLD_TFU_OPS> rgr, PUP will be the FARP at TK, freq CAG: 57.850.

[05:42] <RC_S_J3_AVN_RCC> good morning....I need a bit of info to help coordinate the insertion of 50 ANA pax.

Supplement D (Logbook TF-U 17-06-07)

Supplement D (Logbook TF-U 17-06-07)

LOGBOOK 1(NLD/AUS) Task Force URUZGAN

The plan is to use 2 x NLD Chinooks early this afternoon after they finish the repatriation ceremony for the fallen Dutch soldier

[05:43] <NLD_TFU_OPS> rgr. What info do you need?

[05:44] <RC_S_J3_AVN_RCC> I need information about the insertion zone. What is the grid? Who are the forces that are going to be securing the site? What is their call sign?

[05:45] <NLD_TFU_OPS> loc: 42S TB 2324 3991. C/s w/o

[05:45] <RC_S_J3_AVN_RCC> rgr

[05:47] <NLD_TFU_OPS> unit [redacted] (inf plt)

[05:50] <RC_S_J3_AVN_RCC> this is a NLD inf platoon?

[05:51] <NLD_TFU_OPS> yes

[05:51] <RC_S_J3_AVN_RCC> Is this the area of an ongoing TIC?

[05:51] <NLD_TFU_OPS> att quiet, but yes this is in the middle of the city.

[05:53] <NLD_TFU_OPS> G3 considers timing of 1330 as late. Is it not possible to combine it w/ the resupply flight?

[05:53] <RC_S_J3_AVN_RCC> I'm not sure of the threat in the area, but landing in the middle of a built up area may not be the best option. Are there any other potential landing sites which would be suitable for you which aren't in the city

[05:55] <RC_S_J3_AVN_RCC> It will be late because the aircraft are taking part in a ramp ceremony for the Dutch soldier that was killed a couple of days ago, and then flying his body back to KAF at 11am. They are not available before then.

[05:55] <NLD_TFU_OPS> Sir, this is the safest place we can give you

[05:55] <RC_S_J3_AVN_RCC> ok...I will pass this on to the CH planners

[06:04] <NLD_TFU_OPS> Sir, in and around the HLS there's no fighting att. In the wider area (around the city, we consider the situation as more hostile. The HLS is at the White compound, which is currently the Coy CP.

Supplement D (Logbook TF-U 17-06-07)

LOGBOOK 1(NLD/AUS) Task Force URUZGAN

[06:05] <NLD_TFU_OPS> BG is considering att what to do whith the AMRs.

[06:18] <RC_S_J3_AVN_RCC> sorry...I was disconnected. I have looked at two options for inserting the 50 ANA troops this morning. The CH that is doing the ammo resupply would need [REDACTED] into the LZ to complete the resupply and the pax move. This is very dangerous.

[06:20] <RC_S_J3_AVN_RCC> Second and best option is that one aircraft does the ammo move this morning, and when the second CH becomes available (early this afternoon after the Dutch repatriation ceremony) both aircraft make one trip to insert all 50 ANA into the area

[06:21] <NLD_TFU_OPS> rgr. BG Cdr chooses for the 2nd option.

[06:26] <RC_S_J3_AVN_RCC> roger....I have just spoken by phone with the Dutch Chinook planner and he will contact you in a few moments on MIRC

[06:29] <NLD_TFU_OPS> rgr

[06:35] <NLD_TFU_OPS> OMLT/ANA would like to use the space A in the first wave (resupply in the morning).

Supplement E Appendix 3: JF FW/RW Report 160000Lt - 201200Lt June 07

1) INTRODUCTION

For over two months the OMF pressure on CHORA DC increased (See TFU INTSUMs). On Friday 15th of June a horrible SVBIED attack in Tarin Kowt introduced the occurring attack on CHORA DC. TFU decided to act pre-emptive and ordered the BG to reinforce CHORA. In the night of 15 to 16 June Fixed Wing area recce discovered OMF troop movements in the eastern entrance of the CHORA valley. This was the start of an aggressive OMF attack with the objective to seize CHORA DC. The effect to be achieved by the OMF was, and still is, IO exploitation for the new OMF commanders in URUZGAN able to defeat ISAF forces to re-establish FOM on OMF LOCs from GIZAB to the southern part of AFGHANISTAN.

2) AREA OF OPERATION

See general AAR

3) COMPOSITION OF UNIT

Availability of Fire support assets to A-coy 42 AIBG (Low Land 1.0) in CHORA

a) 12 June - 20 June:

- i) One Tactical Air Control Party (TACP) existing of a Qualified Joint Tactical Air Controller (JTAC), a Laser Target Operator (LTO) and a driver (C/S Windmill 68). Windmill 68 is also a Qualified Forward Observer (Q-FO). TACP was co-located with HQ LL 1.0 in CHORA DC;
- ii) 81mm mortar group existing of 2 tubes deployed at the white compound in CHORA DC (morning 18 June – noon 19 June only one tube available);
- iii) GS of PzH2000 from FOB RIPLEY with DM 131 IHE ammunition;
- iv) ISAF/RC(S) air support:
 - (1) ISAF fixed wing support
 - (a) Planned CAS, to be re-tasked in support of a TIC;
 - (b) G-CAS (30min NTM) at Kandahar Air Field (KF).
 - (2) RC(S) attack Helo's at FOB RIPLEY or KAF

b) 16 June – 20 June:

Additional TACP/Q-FO (C/S Windmill 66) co-located with LL 2.4

c) 17 June – 25 June:

Additional TACP/ Q-FO (C/S Windmill 67) deployed at Southern entrance of CHORA valley (saddle) with LL 1.1. As of 20 June co-located at Coy HQ at the white compound in CHORA DC;

d) 19 June – 24 June:

Additional Q-FO deployed with LL 2.6.

4) MISSION/CONOPS OF UNIT

a) Task

Tasks for Fire support according ANNEX II (JOINT FIRES) to OPOORDER 03 (OP ARAMAY) of COM 1(NLD. AUS) TFU d.d. 01-05-2007

- i) Provide support to ground forces in a TIC IOT attain fire superiority;
- ii) Engage pre-planned targets that meet the Collateral Damage Estimate (CDE) criteria (all fires);
- iii) Provide harassing fire (primarily PzH det) IOT disrupt, deny FOM and demoralise OMF;
- iv) Provide Show of force or show of presence (all fires).
- v) Provide over watch for ground forces (primarily AHs or UAV cap)

b) Purpose

According to FRAGO 19 (OP LEONIDAS) to OPOORDER 03 (OP ARAMAY) of COM 1(NLD/AUS) TFU d.d. 08-06-2007.

TFU will support GoU and ANSF I their effort to maintain security and stability in the CHORA district and disrupt OMF IOT preserve the CHORA District Centre

c) End state

CHORA DC preserved from OMF influences.

5) EXECUTION

See SUPPLEMENT E APPENDIX 2: JF IDF report 160000Lt – 201200Lt June '07 and SUPPLEMENT E APPENDIX 3: JF FW/RW report 160000Lt – 201200Lt June '07

6) SITUATION OWN TROOPS (INCL. COALITION FORCES)

a) General

Saturday 16th of June:

After a restless night ANP posts where engaged by OMF troops in the early morning on the 16th of June. Whole night Fixed Wing (FW) assets controlled by WLs supported LL 1.0 with SA. They discovered large amount of men in fighting age marching up from east towards the SARAB checkpoint. No action was taken because there was no PID on OMF troops. When these men surrounded SARAB checkpoint it was clear that this was a hostile intent. That was the trigger to request additional air support. Around 0400Lt TFU requested RW support from RC(S) iot support the ANSF on the SARAB checkpoints (East of CHORA DC) with SOF from NLD AHs. Around 0500Lt also TFU troops and ANP at check-points NYAZI and KALA KALA (west of CHORA DC) were engaged with SAF and RPGs from compounds. NLD AHs were re-tasked to the TIC and they engaged several compounds in support to TFU troops in self defence situations. After the AHs left TFU troops were engaged several times by OMF indirect fire (IDF) (near misses!). There were no A/C available at that time. The effect to be achieved was destruction of these OMF mor positions. Own 81mm should not be sufficient so PID on a point of origin from the enemy mor fires led to engagements with PzH fires. Fires where very effective and the pressure from OMF IDF decreased. Fire Support filled the gap till new A/C came on station around 1000Lt. There was SAF contact with OMF for the whole day. Allocated A/C

gave enough relieve to hold CHORA DC and to push an additional mech inf platoon (incl add WL) to CHORA. At the end of the day OMF pressure on CHORA increased dramatically. TFU troops had to withdraw 3 km from the ANP checkpoint KALA KALA to CHORA DC and only 4kmsq was occupied by ISAF troops. Com TFU decided that we should hold CHORA as stated in the FRAGO's. FRAGO's. Therefore TFU decided to create an engagement area for a certain period west of vert 42S TB 21, with a last resistance engagement box close to CHORA DC (1x3km) this should be the last standing if OMF kept on pushing. All fires shot west of vert 42S TB 21 and all bombs dropped there were in direct support to ISAF troops in self defence situation. Beside that TFU requested all available air assets from ISAF. After a gap of one and a half hour ISAF pushed an enormous amount of A/C to this TIC. TFU was also supported by several ISR assets, these were able to locate several C2 nodes and individuals of high importance which directly influenced the OMF attack on CHORA. COM TFU decided to engage also these targets as required. Dedicated FW support controlled by a JTAC in the TFU ops engaged several targets of high importance to the OMF ops in the wider CHORA area. FW engaged known enemy firing positions (See 6.c)iii: Air support) and PzH supported the TFU defensive ops with harassing fires west of vert 42S TB 21. It was not necessary to shoot fires in the engagement box (see 6.b)iv: GBFS).

Sunday 17th of June:

During the night WLs engaged OMF key leadership successfully with a Type III controlled mission based on definitive intell reports. There were severe fights continuing through the whole night. All air support missions were executed by A/C under control of JTACs. The day was relatively calm but OMF held pressure on CHORA DC. Early morning of this day TFU decided to open a second front in the same operation (OP TROY) on the south entrance of the Balluchi valley. [redacted] was ordered to disrupt the OMF in the northern DEH RASHAN area. [redacted] run into a severe TIC and was supported by a single ship A/C. The mission was controlled by a JTAC. After the mission [redacted] returned to FOB RIPLEY. In the evening of this day a PzH controlled by a Q-FO engaged a spotter on a mountain ridge near CHORA and supported AUS RTF with an ILL mission in the DEH RASHAN area. Late night, after 48hrs of battle, WLs requested to stop pushing CAS A/C to their locations. They stated this because they were exhausted and needed rest otherwise failures would be made. Due to the calmed down situation Joint Fires TFU decided to take over the night with Type III recce and SOF/SOP missions above the CHORA area controlled by JTACs from TFU ops.

Monday 18th of June

This day started with increased OMF pressure. LL2.4 on the south side of the valley was attacked by SAF, RPG and mor/rkts and fixed to his location. Also checkpoint SARAB (east of CHORA) was attacked again and militia leader [redacted] reported also severe fighting's on the northern routes. Especially the OMF engaging LL2.4 from compounds on the southern side of the green-zone was very persistent. A JTAC engaged these compounds with A/C. Early morning [redacted] and a plt of LL2.0 went up again to the Balluchi valley to achieve the same effect as the day before. This supporting mission for OP TROY should be continued for at least 48 hrs. Again TFU achieved the desired effect because groups of OMF moved from the CHORA area down south through the Balluchi valley. Before noon WLs had to control several missions in support of TIC situations in the CHORA area but in the afternoon the (OMF) focus was fully on our disrupting ops in the DEH RASHAN area. There were severe fighting's going on. [redacted] run into an ambush and

had to withdraw after 2 hours full contact battle under cover of a PzH smokescreen. Beside that they were supported by FW, PzH and 81mm mor from patrol base POENJAK. Due to a lack of ammunition our troops from the DEH RASHAN area returned to Camp HOLLAND at the end of the day. Still ISAF troops occupy the environment of CHORA DC only!

Thursday 19th of June

The night remained calm and TFU Joint fires again took over some Type III controlled recce and SOF/SOP missions above CHORA like the night before. This was the day of the BG attack to seize three objectives. In a combined offensive operation ANSF (ANA) and ISAF troops should occupy the lost checkpoints west of CHORA DC. Joint Fires requested dedicated FW assets, AHs on _____ status on FOB RIPLEY and _____ overhead. Everything was approved. Because there were no TFU troops in the south entrance of the Balluchi valley TFU ops decided to shoot 15-30 minutes of harassing fires with the PzH on planned targets outside the green zone controlled by a Q-FO with predator feed in the TFU ops. Planning was executed. Everything remained relatively calm. AHs were not launched, FW supported with recce missions and PzH shot harassing fires in the wider DEH RASHAN area.

Wednesday 20 of June

Everything remained calm during the night. Late morning an F-16 was tasked to engage a compound from which OMF engaged TFU troops with SAF and RPG on the southern side of the green zone in west of CHORA. A JTAC controlled that mission. That was more or less the last mission in support for COM TFUs intent to preserve CHORA DC from OMF influence.

b) Ground based Fire Support (GBFS)

i) General

From the deployment of the PzH 2000 late 2006 on, the gun has only unguided ammunition available. This is still the case. First there was only the conventional ammunition available with maximum range of 19km. In February 2007 TFU received the first rounds of Insensitive High Explosives (IHE) ammunition. Due to our own operational experiences, TFU is very aware of the fact that PzH equipment and software is less reliable to shoot DM 131 IHE rounds on targets on a long distance. Till now TFU only used this type of ammunition for harassing fires on wide open areas. The distance from FOB RIPLEY to the CHORA valley is approximately 31 km. TFU used the previous months to get comfortable with the "behaviour" of the PzH in combination with this type of ammunition. Corrections from registration fires last weeks in the same environment were used to calculate the right aiming points. This is done in the PzH Fire Direction Cel (FDC) co-located in the BG ops. Own troops have reported that all fires fell within the probable error space of the requested targets.

ii) Fire mission control

(1) General

Because Windmill Ws had to control A/C a lot of fires were controlled by emergency fire controllers (EFC). The situation in this specific time period may be notified as an extremis situation. TFU SOPs states that FS to EFC is allowed in these situations. These EFCs were trained in fire mission procedures before this rotation.

(2) Steps in control

- (a) After PID on enemy, EFC asked for support at coy HQ (White compound in CHORA DC).

- (b) WLs deconflicted all allocated air spt and GBFS and confirmed to coy HQ the use of own IDF asstes.
- (c) Coy HQ ordered a mission to own 81mm group or requested PzH spt to BG HQ.
- (d) PzH fire direction centre and BG ops are co-located to TFU ops, so this was the second step for deconfliction with other additional air space users.
- (e) After approval PzH engaged the requested target.

iii) Counter battery fires

Enemy engaged our troops and ANSF with 82mm mors. Time sensitivity and firepower in engagement were the biggest issues in the counter battery battle. To met these issues TFU decided to execute counter battery fires with the PzH. All fires iso counter battery fires were 2 rounds FFE. In this way proportionality, subsidiary and LOAC were taken into account. Formal CDE was not a factor because these fires where shot in a self defence situation.

iv) Fires in engagement area

The engagement area (west of vert 42S TB 21) is declared by COMTFU and was opened at 162015Lt by COM TFU and closed at 170900Lt by S3 BG. All harassing fires fired west of vert 42S TB 21 in this specific time, where in support of self defence of LL 1.0, ANSF and the Afghan people of CHORA DC. TFU troops had been observing this "confrontation line" over two weeks and TFU had several reports which state that LNs had left this area. Despite that, prior to the engagement on the night of the 16th of June, TFU PSE and PRT informed key leaders (and remaining LNs) on the fact that the had to leave the area asap. Fires shot west of vert 42S TB 21 where initiated and controlled by BG FSO from BG ops in Camp HOLLAND. A big factor of influence on this stand-off fires was the accuracy of the PzH fires shot in the morning under observation of own forces. The effect to be achieved was to disrupt the OMF with harassing fires iot prevent CHORA DC from being overrun. Single round fires were planned on known enemy hot spots and avenues of approach. By shooting one single round at the time proportionality, subsidiary and LOAC are taken into account in this self defence situation.

v) Fire support to battle group attack iso OP TROY

TFU decided not to engage pre-planned targets due to CDE regulations but only to act in case of self defence.

vi) Fire support in DEH RASHAN area

PzH shot rounds in the DEH RASHAN area. This is within the range of conventional HE ammunition. These fires were also in support of the ops TROY. Harassing fires were all shot on locations which met CDE regulations. Other fires were shot in support of TFU units, ordered to disrupt OMF, in self defence situations. Resistance in this OMF C2 node area was very fierce. Own forces observation state that the fires where very accurate.

c) Air support

i) Type of control

All air spt was controlled by qualified JTACs. Two JTACs where [redacted] capable. Almost all type III controlled missions where controlled by [redacted] capable JTACs, so the JTAC had eyes on target and the environment for proportionality, subsidiary or field CDE concerns. Some type III controls could not be controlled by [redacted] due to distance or lack of [redacted] equipment. In this case "normal" Type III controls were done.

ii) Fires in engagement area

The engagement area (west of vert 42S TB 21) is declared by COMTFU and was opened at 162015Lt by COM TFU and closed at 170900Lt by S3 BG. All air spt engagements executed in that time were under control of a JTAC.

iii) Outside line of sight target engagements

Several targets were engaged based on definitive intell reports. Field CDE concerns were taken in account by controlling JTAC and A/C pilot. Engagement is done because of targets imminent threat to the fights in CHORA DC (e.g. OMF C2 nodes).

iv) Predator control

The predator is a very useful asset for improvement of SA.

[REDACTED]

d) Deconfliction

i) General

TFU ops requested a Restricted Operations Zone (ROZ) around the CHORA area. This ROZ was 10nm wide and FL200 high. A JTAC was controlling the ROZ on WINE 07. He was responsible for all deconfliction measures in the ROZ. In some cases the JTAC requested supporting A/C to take care of airspace deconfliction, this worked out really well.

ii) Engagement box

The dedicated engagement box (east of vert 42S TB 21, west of vert 42S TB 22, north of vert 42S TB 37 and south of hor 42S TB 40) is not used for the assigned purpose (last stand for CHORA DC).

iii) GBFS – air spt

Because most JTACs were deployed east of vert 42S TB 21 they kept allocated A/C east of that grid line. Mortars were allowed to fire after approval of the controlling JTAC. PzH was allowed to fire west of vertical 42S TB 21 on demand or in the engagement area at a specified time bracket.

iv) Different air assets

Several times there were more air assets available at the same time (e.g. 2/3 sets FW spt, predator, RW). Due to the fact that there was no direct comms between TFU Joint fires desk (Windmill TOC) and WTs in CHORA one of the JTACs was assigned by WLTOC to be the controlling JTAC on scene. Joint fires desk TFU ordered all incoming A/C to stack from FL 200 up with 20000ft and to check in with the controlling JTAC on a check-in frequency (WINE 07), the controlling JTAC pushed the different A/C to other JTACs (when available) on a strike frequency (WINE 02/CYAN12).

e) KIA/WIA/BATTLE DAMAGE ASSESSMENT

i) KIA/WIA

(1) OMF

OMF stated high numbers of OMF WIA and KIA after engagements with FS assets. These numbers are not confirmed yet.

(2) LNs

Till now there are no facts who prove that LNs died because of ISAF

engagements. There are LNs who state that OMF killed their families or forced them to support the OMF ops and that OMF occupied their houses.

ii) Infra structure

(1) GBFS

The observed impacts caused no collateral damage to other infra structures then the aimed target. Few collateral damage is seen by BG FSO observing UAV life feed movies from the engagement area on Sunday 17th of June. Not all impacts could be observed due to the leaves of the green zone. Last week several PRT specialists had been into that area with the intent to oversee collateral damage. In their reports they confirm that there's no collateral damage to infrastructure seen by them.

(2) Air support

(a) General

All ammunition dropped by air support assets caused no collateral damage to other infrastructures than the aimed target.

(b) Ammo problems

Four DUDs. Three exploded at a second impact with an add bomb at same location. One DUD (UXO) still missing: Tgt grid: 41s QS 76064036.

(c) Two bombs missed tgt.

(i) 100 mtrs northwest of 41s QS 76064036. No coll dam.

(ii) 150 mtrs south of 41s QS 76926446 in open field. No coll dam.

f) CONCLUSIONS

i) General

Fire support assets proved to be a big force multiplier on the battlefield. Because of these assets the enemy could be engaged on a stand off range. This is one of the reasons why there were no casualties according to the severe fights on our own troops.

ii) GBFS

(1) Ammunition

A furthermore developed concept of shooting long range ammunition over the last months gave Joint fires the ability to advise COM TFU on the support with PzH in this extremis self defence situation. According this concept TFU took in account the system fault and the Probable Error on this type of ammunition.

(2) Qualified Forward observers (Q-FO)

A Q-FO is the link to an enormous force multiplier. He is a high value asset for the OSC. Losing this valuable assets will significantly decrease firepower.

iii) Air support

(1) ROWER

ROWER is a very useful system which gives the JTAC more capabilities to be in the final guidance of A/C. Besides that it is improving the SA of the JTAC. The main problem right now is the human factor. There is only one person who is available at any level, this is controlled by the JTAC. He has to control PzH, PzH, PzH and UAVs. That is much in the middle of a fight. Additional ROWER equipment for UAV ops controlled by a person next to the JTAC would improve the SA and create more space for the JTAC on his primary task.

(2) Communications

PzH system has a low altitude satellite and a small bandwidth. This is not

(a) Manning

For more details, see page 24.

in Civil and pushed blades of

then have things could have gone critical.

While the LRP is an economic force multiplier, the TACP is a high value asset for the DSC. Losing this valuable asset will significantly decrease troop firepower.

(1) GBFS

(i) Upg rade software on muzzle velocity and MICMOS ASAP

- (ii) Look into the possibility to perform an buy of Precision guided ammunition. This ammunition will decrease the probable error iot reduce collateral damage and to improve the effects to be achieved.

Q-FO has to be equipped with armoured vehicles to ensure their personal safety and to have the appropriate workspace to do their job properly.

(a) **POWER**

- (i) [REDACTED] POWER for ground forces.
- (ii) [REDACTED] POWER

(i) [REDACTED] and a good satellite for a workable V/U [REDACTED]

(i) [REDACTED] WAC emergency for ground commanders

- (ii) [REDACTED] to be equipped with anchored vehicles to ensure their personal safety and to have the appropriate workspace to do their job properly.

Major

Supplement F (ANA-OMLT AAR report)

AFTER ACTION REPORT (AAR)

NR TIC: OP TROY

DTG: 150001LT JUN 07 until 212359LT JUN 07

1) AREA OF OPERATION

CHORA DC area

2) COMPOSITION OF UNIT

6x OMLT

87x ANA

6x ANP aprox

3) MISSION/CONOPS OF UNIT

a) Task

Clear the green zone from the road leading from Ali Shirzai to the river crossing up to the vertical 20.

b) Purpose

Advance from Ali Shirzai to the vertical 20, or so far as feasible. Clearing the area of OMF and regaining the area previously lost to OMF.

c) End state

ISAF/ANSF are in control of the ground lost to OMF in the beginning of the battle.

The Green zone is free of OMF and the CP's at Kalah Kalah and Nyazi are once again in control of ANSF.

4) EXECUTION

Timing DTG (LOCAL)	Action/Endstate
150001jun07	3x OMLT and 50x ANA in support of the BG in the Chora area. Operating from the brown compound. ANA is mainly defending Ali Shirzai from the outskirts to prevent OMF inserting in to the rural area.
170230jun07 aprox	The situation in Chora is assessed as critical. The decision was taken to insert the remaining OMLT and ANA from TK into Chora asap.
170900jun07	An additional 3x OMLT and 40x ANA where airlifted in to the Chora area. The initial mission was to land in to waves near the White compound to reinforce the ISAF forces at that location. If the LZ at the White compound would be unpermissive, the reinforcements would land five kilometres south of Ali Shirzai in the Desht and would perform a move to contact towards the white compound.
171500jun07	6x OMLT and 30x ANA patrolled towards the river crossing and secured it until aprox 172200jun07.
181100jun07	6x OMLT and 40x ANA secured the river crossing and performed patrol into the Green zone up to aprox 800 metres west of the MSR. Seven males were detained by the ANA, but where later released, when they where identified by the DC.
18 evening jun 07	Issue of orders concerning the attack on the terrain lost to OMF in the previous days.

Supplement F (ANA-OMLT AAR report)

Supplement F (ANA-OMLT AAR report)

190930jun07	Start of movement from the ANA/OMLT from the Brown compound to the starting line of the attack. ANA was organised in three platoons of 28 each, supported by two OMLT each. Furthermore about six ANP acted as guides through the green zone. The ANA would advance on three axis through the green zone with all three platoons deployed.
191012jun07	Start of the advance after some initial delay, caused by lack of air assets.
19 daytime jun 07	Advance through the green zone. Some delay occurred when the road in the north proved to be blocked by OMF, and the Dutch coy in the north could temporarily not support the ANA coy. During the advance the following was especially remarkable: - All civilians appeared to have left the battle field in good order. The cattle was placed outside to graze, the house were left tidy and all houses were locked when they where left. - OMF appeared to have left in panic. The houses they had occupied where not locked, large quantities of fresh bread where found, the tea was still moderately warm. Furthermore boxes of ICOM batteries where found half empty lying on the flour. Some marihuana, grenades and ammunition where found. - The Quala's OMF was using generally had a solid basement where they could shelter from the air raids and artillery fire as indicated by the few civilians still in the green zone. - Only about ten civilians where found still present in the green zone. They where either guarding their cattle or moving towards the bazaar of Ali Shirzai as ordered by PSE. - Civilians indicated that 60 to 100 OMF where present in the green zone at the start of the attack. They appeared to have fled in the western direction. Some where consequently killed by the supporting Dutch coys. Objectives of the attack where reached by aprox 1600 hrs.
191600jun07 aprox	1st ANA plt was ordered to attack and conquer the CP at Kalah Kalah, 3th ANA plt was ordered to occupy the CP at Nyazi. 2nd ANA plt would remain in place until both CP's would be in control of ANA.
191620jun07 aprox	2nd platoon ANA was engaged by OMF in an attempt by OMF to encircle the platoon. The ANA was able to prevent the encirclement in a short but intense close range fire fight. Consequently the 2nd platoon withdrew to the CP at Nyazi.
19 night time jun07	ANA coy was divided over the two CP's and remained there during the night.
200400jun07	ANA at CP Kalah Kalah discovered movement in the green zone. Mortars at Ali Shirzai fired illumination rounds but no OMF could be identified. Later that morning from both CP's ANA/OMLT patrols where organised back in to the green zone. Later that morning OMF started small and unorganised attacks on the CP's. These could be dealt with easily. Although the patrol from Nyazi encountered OMF during the search of some suspicious Quala's. There was an intensive close quarters fire fight after which the

Supplement F (ANA-OMLT AAR report)

Supplement F (ANA-OMLT AAR report)

	patrol could safely return to the CP.
201200jun07 aprox	Fighting in the Chora area came to a standstill and the situation appeared to have returned to normal.

5) SITUATION OWN TROOPS (INCL. COALITION FORCES)

a) Personnel

- i) KIA : 0 although one beheaded ANP was reported by the ANA.
- ii) WIA : 0
- iii) MIA : 0

b) Logistic

i) Equipment

ii) Ammunition used

5,56mm quantity unknown, 7,62mm quantity unknown, RPG 1x.

6) ENEMY

a) Intention of OMF

b) Action taken by OMF

see above

c) Possible future OMF COA

d) Detainees made by TFU

none

e) KIA/WIA/BATTLE DAMAGE ASSESSMENT

NFDK but casualties by OMF are likely.

7) CIVILIANS

Involvement on infrastructure and population

Damage to Quala's was minimal. Damage to crops was minimal. No death livestock was found.

8) LOCAL AUTHORITIES/SECURITY FORCES

a) Involvement : see above

b) Impact : see above

c) KIA/WIA/MIA : see above

9) LEGAL AUTHORITIES

NFDK

10) MEDIA PRESENCE

None.

11) COMMANDERS ASSESSMENT

ANA performed excellent, especially basic infantry skills where above expectations. Total operation was a complete success!!!

Patrol Report PSE TPT in CHORA

Name: local people in the vicinity of Chora Coord: CHORA Date: 19-06-07

It was 19-06-07, it was 0930 in the morning. We moved to position sjerra grid TB 236 371. we moved further to position tango 2 grid TB 229 377. About 1000 hour 2 F-16 past by, a few seconds later we start to send out our message 4 times.

After we drove to the second location tango 1 grid TB 224 373 we send the message two times. We heard on the radio that several people went to the west because there was the road to the south. We also see that some people moved because we had a good view at the green zone. After sending our message at location tango 1 we moved back to our location tango 2 next to the vehicle of the bravo section of unit 3-5.

The message:

Attention, attention, this is ISAF

ANA and ANP supported by ISAF are going to destroy the Taliban.

Please leave your house and go south to a safe place.

Leave your house it will be safer for you and your children.

We are going to destroy the taliban, leave your house and go south, it is better for your safety.

ATTENTION:

Attention, Attention, this message is not for the honorable people of Chora, but for the insurgents who are not confident enough to speak their thoughts openly. We send this message for them to receive.

SITUATION:

We know how you operate. We know that you want to pay innocent people to risk their lives for you, because you are self to scared to attack us. But we also know that the innocent people only want peace. And that they will only help you because you threaten them. The people know that ISAF and the GoA can provide them with long lasting safety and hope for the future. And if the people report to us that you threaten them, you know we will help them and find you and stop your violent acts.

CONSEQUENCE:

When you force innocent people to attack us, you know that we see them as a threat and we will have to defend ourselves. You also know that we are not here to harm people, because we want to help people instead. You say you are fighting a honorable war, but forcing other people to do the jobs you think are to dangerous, isn't honorable at all.

ACTION:

Stop using innocent people to work for you. Fight your own war. If you do not want to fight anymore, surrender to ISAF or ANP forces. We will treat you good. You can have a second chance. Everyone makes mistakes. Don't let those mistakes kill you.

REPETITION:

I repeat: We know how you operate. Stop using innocent people to work for you. You can surrender and be treated well. Choose a honorable and peaceful solution.

TIJDEN GEBED:

0430-0515 uur	Mensen mogen zelf bepalen wanneer ze bidden tussen deze tijden,
1300-1545 uur	BEHALVE als een moskee is! Dan bepaald de moskee de tijd.
1730-1830 uur	De tijden zijn op elke dag hetzelfde, ook op de vrijdag. De tijden
1910-1930 uur	veranderen wel, afhankelijk van de zonsopkomst en ondergang
2030-0300 uur	(eerder bidden of later).

Gespreksonderwerpen LS:

- We weten dat de mensen in Chora onschuldig zijn;
- We hebben dit bericht uitgezonden in de hoop dat de insurgents het ontvangen;
- Wat vond je van het bericht?
- Heb je last van insurgents en kunnen wij misschien helpen?
- Weet je iets over insurgents?
- Bijv. dat ze geld bieden om handgranaten te gooien?

Dere is ooh aan de bevolking gegeven!

Supplement H (SMO report CHORA)

ISAF SMO/ Med Advisor TFU- ATF dd 240800 LT June 07

A. General

1. During the battle voor CHORA a NLD soldier _____ d of his wounds and three NLD soldiers were lightly injured due to a mortarround exploding in a 81mm Mor tube (18th of June 2007). Casualties were MEDEVACed to the Role II NLD TK; lightly wounded returned to their unit the next day, after being treated for their wounds.
2. Two lightly wounded of the SVBIED attack in TK on the 15th of June were brought over to the Netherlands for further treatment. One of the wounded has been brought to the CMH in Utrecht for further observation and additional treatment.
3. During the raid on a IED facility in TK on the 22th of June, 13 detainees have been made. One detainee was shot in his both upperlegs, for which he had been surgically treated in the NLD Role II TK. Later that morning 4 more detainees have been made by '_____'. Handled over to the NLD Detainee facility, for their involvement in the IED-production. On medical environment no further issues.
4. _____

B. Medical/ medical care issues NSTR.

C. Medical care Afghanistan

1. Role 1
 1. General:
 1. Day-temperatures this week around 35-40 Degrees Celsius (Heat-stress index was BLACK entire period)
 2. Medical complaints mostly on skin disorders.
 2. KAF: NSTR
 3. TK: NSTR
 4. DR: NSTR
2. NLD Role 2 (enhanced) TK
 1. General: NSTR
 2. Hospitalizations: 26 in total, of which: 17 x ISAF (5 x WIA, 1 x NBI, 11 x Dis), 2 x ANSF (WIA), 6 x LN (2 x WIA, 3 x NBI, 1 x dis) and 1 x detainee (WIA).
 3. Average use of IC Beds: 24%
 4. Average use of Care Beds: 46%
 5. Evacuated to other facilities/ MTF's: 2
 6. Surgical operations: 7 in total: (2 x ISAF, 1 x ANSF, 3 x LN, 1 x detainee).
 7. Clinical consults: 6 in total, of which: 1 x ISAF (NBI), 3 x ANSF (WIA) en 2 x LN (NBI).
 8. Deceased: 2 in total, of which: (1 x ISAF, 1 x LN)
 9. Work placement SF-medics 1306-1107 on Role 2 TK, Role 1 DR, Role 3 KAF
3. Role 3 KAF:
NSTR
4. NLD bloodbanks:
 1. General: NSTR
 2. KAF: operational
 3. TK: operational
 4. Helmand: operational

D. Rotary Wing Medevac capacity

1. Medevac- requests by TFU:
 - 18 Juni: Chora- TK due to wounded of use of 81mm Mor.

Supplement H (SMO report CHORA)

Supplement H (SMO report CHORA)

- 18 Juni: Chora- TK due to ANP WIA
 - 19 Juni: Poentjak- TK due to NLD soldier with appendicitis.
 - 21 Juni: DR-TK due to 2 LNs with shotwounds involved in family related conflict.
 - 23 Juni: Chora/Sarab-TK due to NLD soldier with severe de-hydration.
2. Total amount of other MEDEVAC missions to Role II NLD TK : none

E. **Assessment support to local national healthcare facilities and/or local national population.**

1. Chora: Assessed due to fightings around Chora 61 local nationals were brought to CHC- Chora (comprehensive health center): 56 x shrapnel-/ bulletwounds, 5 x burning wounds. 11 wounded referred to TK Hospital, of whom one patient being treated by Role II TK NLD (child with gunshot wound to lower leg) and two patients being treated by US FST FOB RIPLEY. At the end of this week all patients that were submitted were once again discharged. Originated shortages on immediate used medication (first direct aid) in CHC-CHORA (especially analgetics, antibiotics, intravenous fluids) on request of the AHDS by PRT TK being measured by delivering available MEDCAP-medication.
2. DR: Sick call Camp Tycz expired by Medical support platoon C-coy DR for use at CHORA (delivered by Role I DR one medical transport group).

F. **HPG**
NSTR

G. **REPATS / Specialistical research**

- 21 June: 3 soldiers BG TFU arrive by shuttle at EINDHOVEN from KABUL.
1. 1 x relapsed kidney-stone.
 2. 2 x shrapnel-/ burns after IED attack of 15th of June.

Supplement I

Report AAR COM BG on the Battle of CHORA 15th-21st of June 07

AAR on the battle of Chora 15th – 21st of June 2007

During the period of 26th until 16th of June, the situation in and around Chora was tense but under control. Almost daily TICs occurred varying in intensity and duration, but always demanding full attention for the proper balance of use of power and used assets. Depending of the threat assessments, I decided from time to time to attach more force elements in Chora or withdraw some wherever possible. This also heavily depended on forces needed elsewhere in the AOR for operations, either being counter-insurgency, force protection operations, or combat operations.

The 16th of June at 0400, an attack was launched by the OMF from the west with a secondary attack in the east. At that moment two motorized platoons and 50 pax ANA were present in Chora. At first, it seems to be an attack as we already got used to, trying to harass our operations and demoralize the ANSF at the checkpoints. However, the intensity of mortar fire and the amount of forces deployed by OMF later that day showed that we were dealing with a different type of attack. At the end of the afternoon, the ANP checkpoints in the west were overrun and the pressure on Sarab hill was enormous. Even in the city center fights were going on. The present and available coalition forces were not able to control the situation and the district center was about to fall into enemy hands. The first displaced persons told stories of execution of civilians by OMF and use of force to fight alongside the OMF.

OSC asked me what to do, was ISAF about to extract or do we stand?

I discussed the situation with Com TFU and due to the strategic value of preserving Chora and not abandon the afghans and offer them to OMF' revenge, the decision was made to stand and hold. During this meeting also the difficulties of defending at night and the possible collateral damage that might occur, were discussed. All items were discussed in length and all possible measures to prevent collateral damage were taken, but also the threat on both afghan population and coalition forces were taken into account.

Although the chance of civilian casualties was identified, we decided that Chora was to be defended at all costs. We decided to engage the strong line (vertical 21 more or less) with artillery and attack point targets with FW under the control of JFACs. Due to the impossibility of direct observations, the artillery fire was led from within the HQ. before we started to engage OMF, we contacted the ANP, ANA and local leaders to inform the population to move to the east and inform us about the moment all that were able were east of the vertical 21.

I ordered some force elements to prepare to move with me to Chora ASAP, and I simultaneously started a fire support campaign for the besieged troops at Chora.

When I arrived at Chora early in the morning of the 17th, the pressure on the OMF (arty and fw) had forced the OMF to withdraw from the city center and to regroup/reorganize both in the east and west. We encountered 80-100 displaced persons leaving the city. They informed us about the killing of civilians by OMF, but also some caused by our fire support. They were thankful for our decision to stay and hoped they could return to their homes soon. We also visited the city hospital, and tried to identify the necessary help they needed. The first need was the transport of injured people. After intermediation this was executed by 12-15 vehicles the next day!

During the day I commanded the fights in the eastern sector, while the western sector regrouped. At 2000, after reinforcing my coy commander with two platoons, I moved back under protectic _____ K for planning future operations.

Supplement I

Report AAR COM BG on the Battle of CHORA 15th-21st of June 07

My staff presented me the COA with regard to a possible counterattack. I decided to attack robust and quick in order to solve the problem with OMF in Chora decisively. My ~~own battlegroup was reaching its culmination point soon, due to the operations in our AOR the last three weeks~~ (both personnel and material). Early morning on the 18th I presented my plan to Com TFU, who agreed to engage the OMF according to this plan.

I reorganized the battle group and I moved with a significant ~~extra force~~ (4 extra platoons and a coy staff) back to Chora. In Chora I did my orderbrief to my subordinated commanders (Com Acoy, Com B Coy and the Com ANA coy). I also coordinated with militia leaders that wanted to join us in order to liberate the DC.

Due to the available extra forces I changed my plan for the counterattack. I identified better communication and coordination measures; therefore the plan could be adapted to the new situation.

It was also clear that my subunits were at the end of their strength due to the heavy combat they had seen in both the Derafshan area and Chora. They were tired, but full of confidence with the plan and followed without any complaint!

19th of June, 1000 hrs, the attack was launched after TPT had informed the OMF to leave the area within 20 mins or lay down their weapons.

My BG attacked over 3 axes of advance in the west, a screening operation in the southeast and a simultaneous attack of militia at Sarab en the greenzone between Sarab and the DC.

All fire support was ~~to be approved by me personally~~ in order to coordinate with force movements and to discriminate possible collateral damage.

After 8 hours of severe fighting, we reached the western entrance of the Chora valley and was the eastern sector under control.

Directly after consolidating, ANSF (ANA) took over the former checkpoints Kala Kala and Niazi and started patrolling the greenzone in between. The BG forces were in overwatch and I withdrew the unneeded troops to the dasht south of Chora.

Not earlier than the 23rd of June all was quiet and could I return to a force presence equal to the presence of the period before June 16th.

MISSION SECRET

AFTER ACTION REVIEW OPERATION "AARDSCHOK" (EARTHQUAKE)

Today I received the message that I had to write an AAR on our operations in CHORA during the fighting.

In this letter I will outline the fights, focus in detail on a number of highlights and touch on our lessons learned as much as possible

The precise dates I have to check with the radio logbook that is being kept at the Bat OPS.

I will start my story with the night from 13 to 14 June 2007. 1 InfPlt was present in an opsbox 1,5km NE of ALI SHISAI when we received the message from the Bat OPS, during the night, that there were OMF-activities of approx 300 fighters in SARI (800m in front of 1 InfPlt)

According to the duty-officer this information was received from

Later on in the night we had air assets overhead to watch, among other locations, SARI and then a quala was found in which potentially a number of OMF were sleeping. We could see hi ~~the images~~

were not completely clear and I requested a recon flight by our AH's. It took a long time until finally the message came from TK that no flight would be carried out.

Lessons Learned: Determine possible targets by using, for instance, the AH-64D.

For days we had been asking for an extension of the ROE's. During the first fights around the post KALA KALA in CHORA we had ROE available. With the ending of OP RABENHAUPT these ROE's were no longer mandated to me. The BG was also working hard to get these ROE's for the troops in CHORA. It was a long time coming.

The situation in the rest of the area was, that there was occasional shooting near the posts on the W-boundary and there was reporting of a concentration of troops in the East, near SARAB.

At the White Compound it was a coming and going of policemen, tribal leaders, village elders and many others, who wanted to see the district chief or us for whatever reason.

During the night from 14 to 15 June the opsbox NE of the city had been taken over by 2 InfPlt. 2 InfPlt was informed about the imminent threat in SARI, the many possible fighters that were spotted by 1 InfPlt and they were actively observing the sector. The District Centre itself was closed off by ANA units.

Earlier in the night 2 InfPlt had observed a lot of activity in ~~the~~ position. From "Deterrence" we went over to "Fight" when weapons became visible and confirmation was received that we were firing in the right direction with our guns.

On the day of the 15th June we checked a number of quala's together with ANA. This had no result.

Because my 1st and 2nd platoon had been active for a while in the opsboxes W and E of the town, I decided to pull back these platoons to the WC for the following night. Early in the morning of 16 June we received a message about the moving of troops from the East towards SARAB. Via ~~a~~ group of approx 80 pax could be seen, who were moving in single column S around the SARAB valley. Fixed Wing was overhead and I reported to the Bat OPS, that I perceived the column as a threat, although no weapons could be seen. At that

MISSION SECRET

MISSION SECRET

moment there was no senior present at the Bat OPS. The Fixed Wing had to leave in support of a TIC near a US FOB.

During this phase I really missed the mandate.

Lessons learned: Give the right mandate to a unit on time. An attack could not be avoided in these days and was just a matter of time.

Around 0500 hrs fire-fights started near the CP KALA KALA and NIASI with a large group of OMF. The DC is asleep and his phone is switched off. Also the battery has run empty when he does turn it on. The 2 platoons at the WHITE COMPOUND were woken up and immediately directed to the opsbox NE of the town. 3 InfPlt was in firing contact almost immediately at CP NIASY, receiving fire also from quala's at the vertical 21. AH-64D were in support near the Westboundary, engaging targets and flew to the East to observe the situation. However on the East side were no targets to be seen. I indicate OMF advancement in the East around the police posts in that area. At the perimeter of the town, groups of men were spotted advancing towards the centre. Because they could not be PID, shots were fired overhead from the opsbox NE and from the rooftop of the WHITE COMPOUND to keep them at bay.

3 InfPlt was combating targets by direct fire in the greenzone in the area of vertical 21 and around both police posts. TB-leader SADAM was killed in this fight.

It could be heard that there was heavy fighting going on in the East on and around the police posts. Smoke could be seen on SARAB hill. Targets could still not be identified from the air.

Around the CP KALA KALA and NIASI the situation around 09.30 hrs was that there was enormous firing from several directions both directed at the posts and at 3 InfPlt. During this turmoil a live hand grenade exploded inside a PATRIA APC. The vehicle could not move anymore at that time. Meanwhile the OMF had started to use 82mm mortars against the posts and the position of 3 InfPlt.

CAS engaged targets on the West boundary and I had to call back 3 InfPlt to my location in order to repair the PATRIA and to look after the PC, who broke a finger under one of the hatches.

When 3 InfPlt was gone from the opsbox, I sent 2 InfPlt to take over their positions, after a short recap. At 12.41 hrs MUTALIB, HEKMAT and SOLMAI (TB cdrs) started a new attack on the West boundary.

In the SARAB-valley, [redacted] fallen into TALIBAN hands and his house was surrounded. TALIBAN had positions in several locations and when we had a PID we were able to engage these targets with our own means and with CAS. 12 and 24 conducted these operations on the West boundary.

At 16.26 hrs 24 supported 12 in advancing north towards the West boundary in support of post NIASI. 10 minutes later 12 was in a firing contact and 24 was under attack from mortars. Using the "sawing" method, 24 had to fight targets also at the edge of the village QUAL EH YE RAGH, square 2237 on the map. Enemy mortar positions were engaged by our own mortar group. Within 5 minutes we had destroyed 2 mortar positions, but especially mortar fire directed at the posts persisted. At 16.59 hrs the ANP abandoned the KALA KALA post. The posts had run out of ammunition and the police car sped East in a shower of bullets. 12 saw the body of a policeman that was killed in the crossfire falling from the back of the car. Another policeman that was following on a motorbike did not get far either. The retreat of the remaining handful of policemen was partly covered by 24 and by the AH-64D's that had arrived a bit later. At 18.32 hrs the platoons at the West boundary reported 50% Class 5 (ammunition). At dusk it was still turbulent in the Western part of the district and in the SARAB valley.

MISSION SECRET

MISSION SECRET

After the post at NIASI had fallen, I called back 2 InfPlt partially to vertical 215 and vertical 225. The road from BALUCHI to ALI SHIRSAI is canalising with a capital C and the danger of being cut off was large.

Lessons learned:

1. A large PRT delegation is needed in high threat areas
2. A plan for humanitarian aid should be made as standard. We knew the clinic in the town was not more than a general practitioners practice. We knew that refugees could come to the town. We knew that fighting causes damage.
3. As the boss I say with hindsight: "If only I had known about the ABARKI-system from DW". This is the defence of areas organised and led by tribal elders and village elders. All you need is a strong leader in the district. Therefore impossible in CHORA. The arrival of [redacted] changed this and he managed to make it work.
4. During pauses in the fighting I called back units to re-supply and recuperate. The actual staring into the eyes of your men is important. I swapped 3 InfPlt for 2 InfPlt after this.

In the night from 16 to 17 June a number of targets were engaged by CAS. Among these were the objects 4022, 4074 and 4131.

On the 17 June it is quiet at 05.00hrs. At 05.45 hrs Cdr ANA reports that TALIBAN have taken positions in the village of QUAL EH YE RAGH.

Near 2 InfPlt's location and 24 large groups of people are moving from the West. These groups vary in size from 100, 75 and 60 pax, taking casualties with them in wheelbarrows and sometimes in the trailer of a tractor. 2 InfPlt also witnesses the burying of a large group of bodies in a large grave in the area of vertical 223.

ANA reports that TALIBAN have sent people away from their homes on the West side.

Local Police reports that the house of [redacted] (of Police in SARAB) has been destroyed and that it is unknown where [redacted] (a cdr on SARAB-hill) is.

At 09.17 hrs I send the OMLT to the clinic to size up the situation. At that moment there are 11 wounded and 1 deceased persons. All shops are closed in the town. CH-47's arrive to reinforce ANA. We send 3R along to have his broken finger looked after.

Most of the day there is a lot of [redacted] about upcoming actions in SARAB and [redacted] on preparations and movement of the TALIBAN.

"Where is the ASP?" is a question many in CHORA ask at that time.

During the day there is sporadic SAF from the West and an occasional explosion can be heard. [redacted] reported that there is fighting between groups of TALIBAN.

[redacted] enough Class V (ammunition) for everyone and orders all to go back.

05 is hopeful when they leave for SARAB-valley to support, but gets into a firing contact in the "saddle" towards SARAB-valley. The saddle is controlled by TALIBAN. With CAS identified targets on the ridgeline are engaged.

At 17.20 hrs the recce-platoon is in a firing contact on the Southbank (252 381). The group of TALIBAN is growing stronger and possibly there are people coming from a nearby mosque (253 386)

overheard:

- The post on SARAB is on fire
- The Saddle (292 388) is controlled by TALIBAN
- At MASAR GHAR has to be a TALIBAN C2 location.

With occasional firing contacts and active target engagements we enter the night.

MISSION SECRET

MISSION SECRET

The morning of 18 June has an early start. There are approx 100 pax in front of the WHITE COMPOUND among which are a number of tribal leaders.

_____ party wants to go to SARAB and we are asked not to fire in the triangle of BARAKZAI. They are going to take care of the situation themselves it is promised. _____ wants to keep his own area free of any enemy (village KARBALA). 24 runs into a firing contact and while the crowd receives directions, we support 24 with our mortar group.

In front of the WHITE COMPOUND people are shouting for ammunition and weapons. The DC is going around aimlessly nagging for ammunition. I take him aside and instruct him to have all friendly forces wear a red/white ribbon around their arm. The roll of ribbon disappears quickly into the crowd and again I take him apart for a quick talk. I give him 15 minutes to sort things out, otherwise the whole thing will be called off. With the use of a loudspeaker finally some structure can be put into the situation. The tape, thickly wrapped around heads and weapons, is put around the right arm. I take the DC and the CoP aside to ask them to use their supplies, which I know they have. _____ police chief) leaves and returns with a vehicle full of ammunition. Together with the DC I walk to his residence on the WHITE COMPOUND. There is a lot there. A ridiculous amount actually for his own bodyguards. When in the office, an explosion causes pieces of the ceiling to fall down and shatters windows. An explosion in one of our mortar positions results in 1 KIA and 3 WIA of our own troops. A tragic accident.

It needs no further explanation that this has an enormous impact on a unit.

Meanwhile the gathered militia have been put into vehicles and moves in column, escorted by 05, on the south bank towards SARAB-valley.

Later on in the afternoon at 15.39 hrs 05 once again runs into a firing contact on the south bank. Use of .338 and .50 wins us the battle.

At the end of the afternoon an ANP casualty is announced to us, who was hit in the face. Everything below the nose is missing. Later on, at the end of the afternoon the wounded finally arrives, just as Cdr BG is present at the WHITE COMPOUND himself to plan the counterattack. A request for MEDEVAC is put forward and the casualty (still alive) is transported to TK.

Early in the evening there is again some 82 mm mortar fire. These targets are engaged by Windmill 68 and 66. Also a C2 node is pointed out by militia fighters and 05 is able to identify the object by insight into the terrain and the object can be engaged by Windmill 68.

The rest of the evening was mainly taken up by commanding the troops, mostly via radio. In the morning of 19 June, unit 26 and its assets arrived on the base and also 12 came to our location. By using a large drawing and the commanders kit (box of building blocks) we repeated the planned move.

We were able to conduct the move according to plan. When moving forward 26 encountered a barrier made out of rocks of 500-1000 kgs. After conducting the search I moved the EOD up from the WHITE COMPOUND to clear the barrier, together with 26 and G.

All this time we had a ridgeline team in the mountains N of our location, consisting of 4 pax from 2 InfPlt. As the operation progressed they played an important role. They were invaluable for marking targets for CAS and fighting TALIBAN by direct fire.

Eventually we could press on after the rocks were blown up. The outer line of ANA we coordinated on the batconet. The choice was made for the wadi N-S near vertical 20. ANA were tempted into running after a TALIB on vertical 20 and had become stuck with 1 platoon in the greenzone. Supported by FIXED WING they struggled their way back to NIASI. Following on both posts were occupied by ANA and our OMLT.

MISSION SECRET

MISSION SECRET

In support (because ANA has no heavy weapons and no night vision capability) unit 26 and 05 remained active in the area near both posts.

Lessons learned:

1. Deployment of a group on high ground has proved useful. They can observe, mark targets and fight targets.
2. Fire coordination during a contact is difficult when there are units fighting both North and South. Bullets fired from the south ricocheted and landed between the units in the north.

So far this is my account on the fighting up to and including the counterattack.

From: TK BG-CP01-B_COY
Sent: woensdag 27 juni 2007 10:19
To: TK BG-CP01-CMD
Subject: AAR 15-21 juni (UK)

What proceeded:

In the period proceeding the 15th of June tension rose in particular in CHORA. Out of several conversations in the area of operations it became clear that the OPPOSING MILITARY FORCES (OMF) would pick up their weapons again after the poppy harvest was finished. The poppy harvest in the DARAFSHAN area would end by the third week of May. To counter this threat the operation HUNTER FOX started in close cooperation with [REDACTED] (the commander's intent behind this operation was to get insight in the reported gathering of OMF in the entrance of the BALUCHI VALLEY/ north side of the DARAFSHAN area with specific focus on the C2 nodes. During the entire operation there were engagements with OMF on a daily basis. During the first 2 days we received mainly 82mm mortar fire and small arms fire (SAF). On day 3 there was a large scale attack on the observation post of 69 [REDACTED]. This engagement lasted over 2 hours, even the deployment of fixed wing and armoured artillery had no noticeable effect on the attacking OMF. Simultaneously the OMF seemed to have started a new campaign aimed at the CF and GoA LoC by placing IED's. Since [REDACTED] D-facilitators could not be more specified at that point in time it was decided to do a SOFT KNOCK TOCK SEARCH (SKTS) on two qualas that were suspected. The first one took place on the 9th of June on the qala 141, just north of the PB POENTJAK. The operation was executed with ANA, 24, 69 and 05. The result was 2 small arms, 2 hand grenades and the remains of some (Dutch) mortar grenades. The main effect of the operation was to send out the signal to OMF that the CF is actively searching for IED-facilitators. Due to the deteriorating situation I deployed with 24 en 69 to a staging area (SA) south of CHORA (a location better known as the saddle). We immediately received fire from the ridge on our Westside. This location was engaged with 25mm and 81mm MR. [REDACTED] a foreign military advisor got killed. The next day we linked up with 20 and 00R on our location. Since the tension in the area did not increase any further at that time, I moved back to TK with 26 and 00R. 24 stayed in the saddle and drew fire whenever moving further north. The following day (13th of June) we re-supplied the ANP post of MAZULLAH and the ANP posts in the CHORA district with ammunition. At the end of the day of the 14th I deployed 69 in a screening position around the village of SEYYEDAN, and specifically the qala 329. The qala supposedly belonged to an IED facilitator.

15th of June 2007:

At daybreak on the 15th 24 joined the SA of 26, just south of the village of SEYYEDAN. At 0600 the inner and outer cordon were established. To our surprise only women and children were present in the qala. The ANA warned the inhabitants to come out of the qala. They entered the qala and secured it within minutes. This phase was directly followed by an intensive search executed by G (engineers) and 26. Result of the operation was 3 small arms, a few hand grenades, some fuses, stacks of documents, Pakistani money and passports. Due to the portraits on the wall ANA was convinced that they were at the right location. The operation was finished around 11.30 and all units returned to the staging area. Around midday we saw a huge explosion in the centre of TK. It turned out to be a SVBIED attack on the patrol of 25. The first armoured personnel carrier was heavily damaged and we suffered 1 KIA.

and 3 WIA. Amongst the civilian casualties were a lot of children who were running alongside our vehicles at the time of the explosion. Immediately following the explosion with 25, the SA of the SKTS was attacked by 1x107mm rocket and SAF (probably PKM) from the direction of FEROSHA. After we returned fire with 25mm I moved out with 26 and 69 towards the KOWTWAL CROSSING. 24 was supposed to stay behind to monitor the effects of the SKTS in the area. Following the exchange of fire I decided to move 24 to SHAH MANSUR since I did not want to leave them engaged on the WESTBANK. Staying behind with 24 myself was not an option since it became clear that one of the soldiers of 25 was (almost certainly) KIA. While moving towards the KOWTWAL CROSSING, 26 were fired upon for the second time by SAF from unknown direction. 26 followed the riverbed of the RUD E DARAFSHAN southwards. On the crossing of the RUD E DARAFSHAN and the TERI RUD, they again drew SAF from the green zone. The ANA dismounted and tried to find the source of the SAF but were unsuccessful. 24 moved to a RON ivo SHAH MANSUR.

16th of June 2007:

Due to the rapidly deteriorating situation in CHORA, 24 was deployed north of the saddle, where they were engaged immediately. In the course of the day the situation deteriorated further, which led to the decision to bind OMF at the entrance of the BALUCHI VALLEY. The intent of that operation was to draw OMF assets away from CHORA and tie them at both ends of the BALUCHI VALLEY. Around 1700 26 and 69 were deployed in CROW 1.

17th of June 2007:

26 deployed in CROW 2 at first light. 69 remained in CROW 1.

Nowhere around 1000, engaged from the green zone and within minutes 26 also drew fire at CROW 2 with 82mm, RPG's and SAF. Despite of CAS by 2x A10, the OMF did not withdraw and the engagement sustained for more than 2 hours. During the engagement, received that OMF were to be reinforced by 150 fighters coming from the CHORA area. Furthermore a number of OMF key-leaders were present in the DARAFSHAN area during the operation (MULLAH AMANULLAH and HAMDULLAH AKHUNZADA). Besides that the encounter was much more intense and fierce then on previous occasions and OMF deployed more weaponry. Before last light we moved out to SHAH MANSUR to do a dismounted patrol. The overwatch was engaged with a burst of PKM, but since we were not able to find a point of origin we did not return fire.

18th of June 2007:

26 and 69 went RTB at first light that morning. In the cause of the morning the situation deteriorated in such a way that it was decided to deploy 26 and 69 once again in the saddle. 35 and 11 joined us at that location at the end of the day. In the afternoon I went to the WHITE COMPOUND (WC) together with 00R to make the plans for the next day. Later that evening I briefed 26, 69, 35 and 11 on the current situation and the plans for the next day, knowing that the combat organisation was to be adjusted by first light the next day.

19th of June 2007:

26 and 69 reported to 10R on the WC to receive further orders. I myself started my issue of orders at 0600 that morning for the operation on the southern axle. At 1000

Supplement K
REPORT Cdr B-Coy BG TFE-3 TFU ISAF

we passed the SL and 35 were almost directly engaged from the green zone. 35 countered this with 25mm and 81mm. 24 advanced towards the police post KALA KALA and deployed on the southern mountain ridge followed by 11. At the point when 24 and 11 were in position on the South and 26 and 12 in the North the ANA advanced through the green zone. Especially this movement led to huge distress amongst OMF probably because they did not foresee this. During this advance OMF engaged ANA several times by SAF en RPG. With 25mm and CAS several groups of OMF were attacked. Around noon the ANP Post of KALA KALA and NIAZY were recaptured and occupied by ANA. After ANA started their patrol schedule through the green zone, 24 and 11 moved back to the SA. 35 stayed in position in the saddle.

20th of June 2007:

In the morning I went for re-supplies to the WC with 24. Afterwards 24 deployed again on the Southern ridge till 18.30 then moved back once again to the SA.

21st of June 2007:

At 07.00 moved back to TK.

FUNCTIONAL SPECIALIST HEALTH

Brief summary visit Chora Health Centre (CHC) JUNE 220915 – JUNE 221115 2007

The objective of the visit was twofold: to assess the actual state of affairs concerning the wounded civilians within the CHC and to find leads from medical staff concerning persistent rumors on gross human rights violations (HRV) that were allegedly committed in the period June 16-19 in the vicinity of Chora. In summary the conclusion would be that the situation concerning the wounded civilians does not reflect the reports that were submitted during the days of the fighting and that relevant figures will have to be scaled down. As for the HRV, initial assessment would be that they were in fact committed, and that scale and ferocity need further investigation.

The exchange of views with the medical staff was conducted in one of the rooms on the compound of the CHC, the venue where the pharmacy and operating rooms are located. The following facts of relevance can be summarized as follows:

- The number of patients that entered into the CHC on the first day of fighting (JUNE 16) was confirmed as 42;
- The number of patients admitted during the following days concur with the figures as reported by FS-H over the last week;
- As of yesterday all patients have been discharged. Currently the CHC has no patients under treatment;
- The medical emergency supplies that were sent by pouch from TK(PRT) to CHC on JUNE 20 have in fact arrived (pictures available);
- From the lengthy discussion on nature of injuries treated and type of treatment it transpired that all but five patients had suffered battle injuries. The other five had suffered severe burns (see below);
- The medical staff has managed to record cell phone movie of approx 16 mins., all of which was shot on the first day of fighting.
- The tour we made through the medical facilities included a male inpatient room, female inpatient room, delivery room, bathrooms, laboratory, doctor's room and a pharmacy (pictures available). Remarkably, the trolley in the first aid room was covered with pinkish stains, that could later be identified as Gentian Blue (a fluid that is commonly used for treatment of burns);
- The overall impression would be that all primary health care facilities, including supplies are available; the state of facilities can be described as clean and well maintained. Staff was cooperative and appears professional. However, they feel unprotected and therefore cannot leave the medical compound for safety reasons. On top, they indicated to be fearful of Tabiban revenge any time.
- As for the patients that were brought in with severe burns, Dr. Matiullah (the pharmacist) indicated these were probably not injuries caused by battle. He specified that he had seen a woman that suffered from 3rd degree burns (100%), and two males (50%) and two children with similar injuries.
- As the discussion as to the cause of the injuries was inconclusive, the case should be further looked into, to more so as Dr. Matiullah indicated that there may be more cases that he is not aware of.

FUNCTIONAL SPECIALIST HEALTH

Brief summary of meetings held and places visited from JUNE 231900 – JUNE 251500

1) Following the meeting at the ANP station in SARAB JUNE 23, our interpreter [redacted] with us an observation based on conversations he had with locals over the last few days. More specifically, a number of locals have confirmed the story that:

- The first days of the fighting OMF have kept local inhabitants in a qala North West of SARAB. They were unable to leave their house as the qala was in the line of fire. OMF then either killed the locals, subsequently provoked CF aerial assault that proved accurate (destroying the evidence), or the locals were killed by a CF aerial attack that missed the OMF target and hit the qala instead. The number of locals killed allegedly does not exceed 10 pax.

Note: Firstly, either way the result is approx ten civilian casualties. Secondly, the security situation prevented us from visiting the site North West of SARAB. Thirdly, again the confirmation of the incident probably does not derive from eye witnesses.

2) JUNE 24 FS-H and FS-L accompanied a platoon that was to visit QAL'A-I-RAGH and AWI to conduct damage assessment. That would constitute an opportunity to assess rumours about IDP's in the vicinity of settlements mentioned. At the crossing near NYAZI, however, increased ICOM transmissions that OMF attack was imminent in combination with OMF observed near CEMETERY HILL (own eyes) made us stay put. An ANA/CF foot patrol was sent toward the green zone. No fire contact ensued. Further intrusion into the green zone was aborted.

At NYAZI, south of the crossing near ABDULLAHKHAN, we observed two qala's that had obviously been hit by aerial bombardment, each missing one side of the surrounding qala walls. The security situation prevented us from conducting inspections at close range. (Pictures from afar are available).

3) JUNE 24 FS-H and FS-L had a brief conversation with [redacted] CHORA who was willing to share his experience over the last week [redacted] who claims to be a medically trained professional, runs a pharmacy in CHORA and is married to a [redacted] wife. [redacted] contends he acted as a medical relief worker the first few days of hostilities in CHORA. For unknown reasons he was dismissed by the CHORA Health Centre (CHC), at which point he decided to act on his own. He asserts to have been medically active for three days, but was not able to present us with facts to substantiate this claim.

[redacted] however did confirm the number of admissions at the CHC on the first day of the fighting as 42. In addition, he indicated he had seen over 10 casualties being brought into the CHC that very day.

What raised our suspicion was his profound interest in the whereabouts of PRT employee [redacted] who until recently occupied the position of tribal advisor. Additionally, [redacted] was unable to present us with any substantial details on his medical relief activities during the first days of the hostilities. He could not elaborate on basic medical treatment and was not aware of commonly used medicine.

4) JUNE 25 at 0800 FS-H and FS-L revisited the CHC, meeting with pharmacist [redacted]. pending issue of collecting the mobile phone film clip was speedily resolved, although [redacted] is hesitant to provide us with it. Upon reassurance that the film would be for strictly-limited ISAF use only (to be specific, transcription of audio fragments only to assess crucial details on number of casualties and wounded), [redacted] was persuaded to hand over his mobile phone. The film was retrieved at the OPS ROOM [redacted] and subsequently transported to TK. The mobile phone is currently in possession of [redacted] brought back to him in a second visit around 10H30.

FUNCTIONAL SPECIALIST HEALTH

5) Initial summary of the audio fragments from the 16 minute mobile phone film clip that was shot t
1 the first day of hostilities IVO CHORA (JUNE 16).

- A number of patients injured IVO QAL'A-I-RAGH are being interviewed by medical staff while under medical treatment in CHC. While they exchange their experience and elaborate on their wounds, they indicate to have witnessed OMF assault first, followed by CF aerial attack. Three patients explicitly mention this sequence of events.
- They tell the interviewer about their relatives that survived the hostilities and at some instance the patients mention exact number of fatalities.
- Based on the account of five adult patients, the number of fatalities can be estimated at 25 civilians (on the first day IVO QAL'A-I-RAGH).

FUNCTIONAL SPECIALIST HEALTH

Brief summary visit SARAB JUNE 231230 – JUNE 231930 2007

The objective of the field trip was to pay a visit to the ANP station in Sarab, to make the first enquiries after the hostilities that took place JUNE 16 – JUNE 19 and to find further leads (positive or negative) on gross human rights violations (GHRV) that were allegedly committed in SARAB and the immediate vicinity.

In summary the conclusion would be that from a security perspective the situation in Sarab and vicinity is relatively stable, be it that north-west of SARAB one qala is said to be still occupied by OMF. Local ANP however contended that said qala does not pose any immediate threats. As for the humanitarian aspects some traces found in the CHORA Health Center (CHC) were confirmed as having derived from SARAB. In addition, a number of killings committed by OMF were confirmed by our ANP counterparts.

The exchange of views with the ANP was conducted in the main building on the ANP compound. The following facts of relevance can be summarized as follows:

- As for the general security situation it was observed that people were out on the streets, making contact with ISAF by waving and smiling.
- Upon arrival immediate contact was established with two youngsters who confirmed that at the onset of hostilities most of the civilian population had fled to the mountainous area north and south-west from SARAB. The number of civilians within SARAB (and its immediate vicinity) during the fighting had therefore been limited. Hence civilian casualties as a result of ISAF intervention are nil, be it that OMF revenge on civilians as a result of ISAF presence in the area has caused the death of at least 10 people.
- After the ISAF operations OMF had fled from SARAB, save for a small number of OMF that had retracted to a qala north-west of SARAB. Security concerns were limited, but still prevented us from traveling into that direction.
- As for the humanitarian aspects that came to the fore, the number of patients that have been treated in CHC originating from SARAB amounts to approx 15-20.
- The wife and brother of ANP commander [redacted] were confirmed as murdered by OMF and subsequently burnt. Note: these victims account for two of the five fatalities due to burns as registered in CHC.
- The rumor of OMF intruding into a qala, taking the occupant family as hostages and subsequently provoking ISAF aerial assault was confirmed by our ANP counterparts. Note: ISAF confirmation on the assault IVO SARAB is still required.
- On our way toward SARAB a woman mourning at a fresh grave near SARAB was observed. The number of fresh graves at the cemetery was estimated as no more than 5. (Note: the estimation was made while driving by, therefore no accurate counting was possible).
- The rumor concerning 10 people with their throats slit lying in the street that had allegedly been observed IVO SARAB, could not be confirmed by our counterparts. According to the latest, more accurate account said atrocity was committed IVO CHORA. Further details may be forthcoming following additional enquiries in CHORA.
- Similarly, to date no confirmation has been obtained concerning the rumor of an old man that was caught by OMF in CHORA, who was forced to put on a suicide belt containing explosives and subsequently detonated.
- Following the leads obtained over the last few days, and in line with the planning of 1.1, currently the intention is to accompany 1.1 today in their patrol to AWI. This will be done to follow-on information that a number of IDP's is said to still reside IVO AWI. Reports to follow.

**FUNCTIONAL SPECIALIST HEALTH
SUMMARY REPORT FS-H AND FS-L ON FIELD VISIT JUNE 21-25 2007**

From JUNE 211200 until JUNE 251730 FS-H and FS-L were on mission IVO CHORA. The objective was to assess the actual state of affairs concerning the wounded civilians within the CHORA Comprehensive Health Centre (CHORA CHC) and to clarify persistent rumours on human rights violations (HRV) that were allegedly committed in the period JUNE 16-19 IVO CHORA.

During the five day mission FS-H and FS-L, accompanied by force protection, were able to visit CHORA, SARAB, QAL'A-I-RAGH, NYAZI and the immediate vicinities of the settlements mentioned. Over five days two HF radio message reports were sent out to TK HQ, a third report was drafted upon return. The three reports are annexed to this summary report.

In brief, the following preliminary conclusions can be presented:

- While the exact number of fatalities and wounded civilians is difficult to establish, interviews with local population combined with a visit to the CHORA CHC seem to confirm figures that were initially presented (30-40 fatalities and approx. 70 wounded civilians). By the time of visit to the CHORA CHC all patients had been discharged by JUNE 20.
- Taking into account the obvious caveats (limited mobility to conduct investigation, the likelihood that patients may not have reached medical facilities/treatment etc.) these figures are probably not precise but they give an estimation based on a visit of the main locations where CF activities were executed.
- Further enquiries at other, currently less-permissive locations may reveal additional information notably on OMF HRV.
- Rumours on human rights violations by OMF are persistent, notably IVO SARAB and QAL'A-I-RAGH. People assisting or cooperating with ISAF were likely victims, though personal or tribal rivalries may also have taken their toll. While facts are hard to establish, several interviewees claim that OMF have killed and subsequently burned at least three civilians. In addition, the case of OMF taking at least 10 civilians hostages IVO SARAB that led to their death was confirmed by several sources. Other accounts of HRV could not find confirmation by other sources.
- Eye witness accounts from QAL'A-I-RAGH persistently claim that it was OMF that opened hostilities first, that provoked CF counteraction. (Source: interviews with patients during their treatment JUNE 16, in CHORA CHC).
- Red Crescent TK claims of large amounts of Internally Displaced Persons wandering IVO CHORA and SARAB could not be substantiated.
- Witness accounts are evidently difficult to gather as people fear for their lives as soon as ISAF tries to contact people.
- Damage assessment conducted was very limited, mainly for security reasons.
- Patient Admission list of CHORA CHC, registered during the first four days of hostilities, are currently being translated.

Appendix 1
FUNCTIONAL SPECIALIST HEALTH

Transcripts 16 minutes audio recorded JUNE 16 at CHORA Comprehensive Health Center

This transcript is the translation of a cell phone film of approx 16 minutes made by personnel of the medical staff on the first day of the fighting.

Questions posed by medical staff to patient:

"How is it going?"

"How many casualties you have at your house?"

"All are buried under the debris of our house"

"Who bombed your house?"

"The US"

Other medical staff: *"Do these need transport to TK?"*

Second patient indicates he is in pain while the medical doctor touches his injuries.

Question: *"Where is he?"*

"Is he a relative (of the first patient)?"

"Are there more casualties in his house?"

"He is not a relative."

"Yes, she is the daughter."

Question of medical staff: *"When did it happen?"*

"Just before sunset, in Qal'a-i-Ragh"

"Who shot first?"

"We don't know"

"Taliban opened fire from the one side, and then the aircraft came in."

"From the other side", the patient replies.

"And then he was hit."

Medical Staff: *"We have to act swiftly, otherwise we loose this one."*

Supplement L
Appendix 1
FUNCTIONAL SPECIALIST HEALTH

“... (unintelligible) ...”

Images of Female Department.

Images of seriously injured patient lying on the ground. No audio.

Images of child.

Question to the child: *“Where are you hurt?”*

“She does not know” (Child does not respond, is in shock).

Image of Male Inpatient Department

“Chief of the CHORA CHC paid the District Chief as well as the Mayor a visit to confiscate cars.”

“I also asked the foreigners: why are you doing this to us?”

“If the driver does not co-operate, he will be arrested.”

Again images of a child – head in bandages.

“What’s your name?”

“Walimo”

“His father is from Qal’a-i-Ragh”

“His living room collapsed”

“His name is Mr Toj Mohammed”

“The five kids of my uncle died. They were bombed.”

END OF AUDIO – END OF FILM CLIP

ASSESSMENT:

- Patients reveal plausible data on number of fatalities and injuries (a number of them have also been confirmed via other sources).
- A number of patients indicate that it was OMF that started hostilities (though it remains unclear against whom in particular).

Supplement L

Appendix 1

FUNCTIONAL SPECIALIST HEALTH

- What is striking in the film clip is that at two instances patients are directly asked how they feel about the treatment in CHORA CHC. The purpose of the question seems to be to possibly prevent allegations that medical treatment has not been provided to all parties involved.
